WORLD HAPPENINGS BRIEFLY TOLD

L. F. Philie, director of finance for the city of Montreal, announced all of the city's \$12,943,000 loan had been subscribed.

The 1936 general assembly of the Presbyterian Church in Canada will be held in Montreal street church, Hamilton, it was decided.

The Prince of Wales has publicly endorsed a suggestion that a British Legion deputation should pay a goodwill visit to Germany.

Henry Ford, departing from custom, received in person an honorary degree of doctors of laws from Colgate University, Hamilton, N.Y.

Reports in diplomatic circles stated Germany in negotiations with Italy, had proposed a plebiscite for Austria to bring about final settlement of the Austrian question.

Cost of administering the United States N.R.A. in the two years ending this month is placed at \$93,884,596 by the National Industrial Conference board.

Twenty-eight civil servants under the age of 44 years have been retired on superannuation because of ill health since Aug. 1, 1930, according to a return tabled in the house at Ottawa.

Jerry Johnson, Minneapolis parachute jumper, who bailed out of an aeroplane 15 consecutive times, is now claiming a new world record for the most jumps in one day. The former mark was 14.

The first leather footwear for the Dionne quintuplets was selected at Chicago at the shoe manufacturers' fall opening. Of a fashionable type, the shoes are size No. 2, and the material white leather, with leather soles. They have "T-straps" with pearl buttons.

Would Improve Cotton

China Plans To Raise Quality Of Her Product

China is to improve the quality of her cotton by the importation of 20,000 pounds of U.S. cotton seed as a first step towards strengthening the textile industry and making China less dependent on British and Japanese supplies.

The Chinese Government has made by the Chinese Government's National Economic Council. Although cotton has been grown for hundreds of years in China, the product is of poor quality. Only the most lowly classes wore cotton, silk being the only wear for the middle and upper classes.

Now that cotton fabrics imported from Britain and Japan are being universally worn, and British and Japanese mills are also supplying the cheaper market, Chinese mills are experiencing bad times. The best raw cotton has to be imported.

The Chinese Government hopes to build up an industry to meet China's ordinary demand for cotton and reduce the adverse balance of trade caused by purchases abroad.

Russian Treasure

Looted Ship Reported To Have Been Lost In 1721

A fabulous Russian treasure ship, which ancient lore says sunk in 1721, with "14 large barrels of gold" in its hold, was reported to have been located by deep sea divers in Finland.

Excitement ran high at the report, although there remained no definite assurance the wreck discovered near here was the one long sought.

Was Riel's Brother-in-Law
Louis Lavallee, 38, brother-in-law of Louis Riel, died recently at St. Vital, Manitoba, a short distance from the place where he was born. Lavallee was one of the men who went to Regina to bring back the body of Riel, hanged for leading a rebellion.

Zuni Indian women of the American southwest are so used to handling large pottery jars on their heads that some women can even run without touching the jar with their hands.

If taken from the water and allowed to dry, and then placed gently on the water surface, a diving beetle finds itself unable to dive.

An eminent Baltimore physician has said that snake venom becomes harmless when exposed to ultraviolet light.

Hay Fever Season Near

New York Doctor Has Treatment For Numerous Allergies

The hay fever "season" drawing near, Dr. William H. Diefenbach, of New York, revealed what he believes is an effective treatment for that ailment, and also for common colds, abscessed teeth and certain types of tonsillitis.

The treatment, he said, is by ultra-short radio waves, and is administered by a small economical apparatus not unlike a short wave radio set.

Dr. Diefenbach, speaking before the convention of the American Institute of Homoeopathy, explained the machine was developed after a study of the reason why radio operators, working in close quarters on ships and subjected to short waves, did not have colds.

The patient is placed on a table, the physician explained, with his head between two electrodes which do not touch him. The cold treatment, he said, takes 15 to 20 minutes and is given daily for five or six days.

A Distinguished Unit

King's Jubilee Procession Was Headed By Life Guards

The Life Guards, by the way, originated in two troops of devoted cavaliers who followed King Charles II. into exile.

This distinguished unit, whose proud duty it is to guard the sovereign, has a glorious battle record dating from the time of Dettingen and Fontenoy to the Great War.

It is an interesting fact that for the first time since Queen Victoria's Jubilee the entire King's procession was led by a captain of Life Guards.—London Daily Mirror.

Here Is A Definition

Berserker, Meaning Frenzied Anger, Comes From The Icelandic

Here is a phrase concerning frenzied anger bordering on madness. When it comes to appropriating what it wants for its own purposes, the English language plays no favorites.

So, we have this expression from the Icelandic, berserker. The allusion is to the mythological Scandinavian hero, Berserk, who fought naked and regardless of wounds, while under the influence of intoxicating liquors.

SISTER AND BROTHER DRESS ALIKE AND LOVE IT—MUMMY WILL WELCOME IDEA TOO

By Ellen Worth

Many a smart mummy has decided to dress small brother and sister in togs of similar styling. As for example, the models patterned to-day show just how smart and practical they can be.

Sister's dress is made of white dimity. Brother's shorts are baby blue cotton broadcloth, topped by white dimity blouse.

Another cunning scheme is both models carried on Monday. Sister's dress is a short-sleeved, button-down, from the place where he was born. Lavallee was one of the men who went to Regina to bring back the body of Riel, hanged for leading a rebellion.

You can have brother and sister pattern for price of one if you order them in same size, but if ordered in different sizes, the patterns are 10 cents each.

Style No. 667 is designed for sizes 2, 4 and 6 years. Size 4 requires 1 1/2 yards of 35-inch material with 3/4 yard of 35-inch contrasting for dress; and 1 1/2 yards of 35-inch material with 1 yard of 35-inch contrasting for trousers, for suit.

Patterns 15c. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Our Beautiful Snow And Blue Geese

By JACK MINNER
Canadian Naturalist

Readers please pardon a few words of my wild goose history. The client facts are that I was from 1904 to 1908 getting the first 11 Canada Geese to alight at Kingsville, and by 1912 the flock had grown to be known all over the continent. That spring one blue goose came with the bonkers and to tell the whole truth I had not been far enough from home to know what it was, but we named her dolly white head. In 1915 we started banding the Canada Geese and soon got in touch with the Eskimos and Missionaries of the far north. We found that the Eskimos called these Blue and Lesser Snow Geese, Wavies. Well gradually more and more waves came until I found myself weaving and waving away into wavy anticipation as waves were seen at Point Pelee, Rondeau, St. Clair Flats, Cedar Creek, and Anderson Marsh. In fact odd ones were seen for fifty miles around our sanctuary and I got the snow and blue goose fever so badly that I wrote Mr. Paul Redfern that I was then Chief of the United States Biological Survey, at Washington, D.C., asking permission to lead the Louisiana Marshes to band the waves. He replied at once stating that he would allow me the privilege of I would put the United States Biological Survey Bands on them, but I made no reply, but in about two weeks I received another letter offering me the privilege to put my band on one leg and the United States Biological Survey band on the other. Readers please pardon my lack of grammatical education, but if Mr. Redfern had written me the last letter first I would have banded five thousand of those waves in less than three years, and the results could have gone into all the schools in America. But by the time I received that last letter I had changed my plans and was on an evergreen forest border two rods wide around a ten acre back field, then I saw a small pond in the centre of the field and I placed ten acres of the wavy field and I placed five wing-tipped waves in this ten acre, and last spring, 1934, I caught and banded seven waves, six blues and one snow, and according to a report I saw that the waves there was a blue goose seen near London. This is fully one hundred waves from my home, where we are gradually drawing the waves from the West, but the report stated this goose had orange color on its head. Now this orange is not a good color at all; it is an orange stain gathered from feeding in the dead grass and wet tallow which the waves absorb from the tender roots below. Well, about May 10th, these seven banded waves flew and took the northern air line special for Paris as yet unknown to me, and nothing worthy of mention happened until between one and two A.M. October 20th, I was awakened by an ear-full of goose honks, and when daylight came we found that the waves had arrived, and one young snow goose. We named this goose Lucy Snow and Lucy Snow is going to be banded. Monday, October 29th, was a beautiful cold morning and the bright blue sky was dotted here and there with low dark scudding clouds. The sun shining through in different places gave the heavens a glorious—yes, I feel like saying a glorious whiplashing effect. I was, of course, out chumming with all nature, when the north eye picked up something a sight as I will ever remember. Here were about fifty honkers with their honks and motors shut off, planing down out of the heavens. They were not moving a feather, but remained in their V formation and apparently just sat down on their feet. Their wings bowed downward in a half circle, as perfect and as uniform as so many new moons with their faces down. Following them was not a flock, but a small swarm of waves—yes, there were over five hundred of them. Some of the V-shape lines would be most all snows, while the others would be blues. Some lines were mixed about fifty. The adult snow geese being pure white, all but about twelve flight feathers at the tips of each wing, which are dark; the young being a smoky white. The adult blues have a pure white head and slate colored breast. The young blues or wavy lines to dark slate color, and heads from smoky white to dark slate—seldom two alike. These lesser snows and blue geese are one and the same birds in habits and size. They differ only in color and in captivity they will cross as readily as wattle-dot chickens, and I am sure they cross in the wild state, for I have a high-bird wild one here right now. So it is plain to be seen there would be at least six different colors in that beautiful flock of waves. Yes, the Eskimos have it right. They are waves and how they did wave and wave in the sunlight and shadow as they passed over this sanctuary, and will you believe it this swarm of waves was followed by another flock, then later on another and another until five flocks passed over, and in all there would be at least fifteen hundred. They passed over Kingsville on Monday, October 29th.

I believe they were booked right through to Louisiana, but had there been only fifteen or twenty in that first flock, my picked-up bird knowledge causes me to believe they would have landed here with the fifty bonkers that they were following. I also believe they had rested somewhere between James Bay and here, as the wavy lines were young birds, and they were all flying high and strong. In closing I just wish to say that in the little I get out of knowing that the Canada Geese are gradually influencing these beautiful waves to come.

The latest Fashion Magazine is better than ever. Entirely illustrated in color you will find it a very stimulating fashion edition. There are clothes for cruising and clothes to brighten the lives of stay-at-home. Many delightful little models for the smaller members of the family. Of course, patterns are obtainable for the designs illustrated. Send for your copy today, the price is 15 cents.

I had gone into Louisiana and banded seven thousand. Therefore I can tell you that I am very thankful I did not receive that last letter first.

REDFERN, LONG MISSING PILOT

New reports that an informant had sighted Paul Redfern, aviator, missing nearly eight years, shown beside the plane which was believed to have crashed in the South American wilds, gave hope to his wife, Mrs. Redfern, now living in Cleveland, that she might once more see her husband alive.

Request Of Charles Dickens

Great Novelist Wanted No Other Memorial Than His Works

A sight-seeing visitor asked me why London has no full-sized statue of Charles Dickens. The answer is to be found in this quotation from the great novelist's will:

"I conjure my friends on no account to make me the subject of any monument, memorial or testimonial whatever. I rest my claims to the remembrance of my country upon my published works."

I happen to know, however, that some American admirers, in their zeal, have overridden this stipulation.

In the public gardens at Philadelphia there is a full-length sculptured memorial representing Dickens seated in an armchair. At the base of the pedestal Little Nell gazes affectionately up at her creator.—London Daily Mirror.

No Leather Shortage

Situation Here Not Parallel With United States

Canadian consumers and boot and shoe manufacturers have no need for concern if a shortage of heavy sole leather due to drought and increased slaughtering of heavy cattle in the United States develops in the republic, Dominion government officials said.

"The feared United States situation is not paralleled in Canada and the slaughter of heavy cattle in the Dominion is almost negligible, as the tendency is to market our cattle earlier than formerly," officials said. Approximately 95 per cent of boots and shoes worn by Canadians are manufactured in this country, it was estimated. Of those imported the great bulk was from the United Kingdom.

Last Of The Commanders

Death of Viscount Byng of Vimy removes the last of the commanders of the Canadian corps. Of these, two were regular soldiers, Lord Byng, Major-General E. A. H. Alderson commanded the Canadians. He took over the corps when first formed.

The only native American people who produced books were Indians of Mexico.

PATTERN 5360

If you're planning to go places and do things at it, even if it's just a neighborly visit, you want to add this adorable cape to your wardrobe. You'll immediately transfer all its adorableness to yourself, it's a most flattering accessory. You can make it in white, black or any of the pastel shades. And can't you imagine how lovely it will be over that summer georgette or chiffon? It is crocheted in cotton and its soft draping adds richness and charm to your appearance.

In pattern 5360 you will find complete instructions for making the cape shown; an illustration of it and of all stitches used; material required.

To obtain this pattern send 30 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Landmark Being Returned

Old Clock To Be Seen Again Outside London Church

For over a century and a half one of the chief landmarks of Fleet St., London, had been the clock outside the church of St. Dunstan-in-the-West. Built by Thomas Harry in 1671, it was the first in England to show the minutes. In 1835 it was considered an "eye-sore impediment" and was sold to the third Marquess of Hereford. Now the clock, being considered an architectural ornament of great value and beauty, is to be returned.

There is a tradition that the third Marquess of Hereford (1777-1842) used to be taken by his nurse "when he was a good boy" to see the hours struck.

Soviet Divorce Laws

Feeling Held In Russia That There Should Be More Stringency

The communist party's organ Pravda, called for a campaign against "Don Juan"ism and abuse of the easy Soviet divorce laws.

In line with the new Bolshevik "morality program" which the press has been preaching in recent weeks, Pravda said a woman must not be treated merely as a subject for flirtation, to be abandoned after a short-term marriage.

Both marriage and divorce are obtainable in the Soviet union merely by registering in the neighborhood civil registry office. Too many people, Pravda said, view marriage as they do taking a street car ride.

The Usual Place

Possibly you, too, have wondered where King George puts his hat when he is in church. When His Majesty attended the thanksgiving service in St. Paul's Cathedral in London, he was wearing the special plumed hat that is reserved for such occasions. During the service, the hat was simply put on the floor at the King's feet, just where every other man usually puts his hat when he goes to church.

The first section of Moscow's subway, under the heart of the city, has been completed.

Byng was wearing the special plumed hat that is reserved for such occasions. During the service, the hat was simply put on the floor at the King's feet, just where every other man usually puts his hat when he goes to church.

Roses Old And New

Hybrid Perpetuals Are Recommended For The Beginner

Although this is the day of the hybrid seedling roses, the sweet-smelling, fragrant Irish rose has not been driven from the Dominion. Its delicate perfume still permeates the summer evening air in many a Canadian garden and flourishes as a Canadian.

The hybrid may be more beautiful to the eye but it lacks that fragrance which lends an inexpressible charm to the home garden. Holland is a country which has developed the hybrid to a very high degree of perfection and from there Canada gets an immense quantity of rose bushes every year. In 1934 the total importation into Canada was 285,000.

France alone supplying 125,000 bushes. Great Britain sent 60,000 and the rest came from Denmark, France, Belgium, Italy, and the United States. The beginner in rose growing would do well to keep to the hybrid perpetuals for a season or two before attempting to grow hybrid teas, which though more continuous bloomers are less hardy and less vigorous in their habit of growth. Save varieties for the beginner are Hugh Dickson, red; Mrs. John Laing, pink; Frau Karl Druschki, white. Climbing roses need careful protection but are worth growing. Some of the hardiest, mentioned "Spring Work in the Rose Garden," issued by the Dominion Department of Agriculture are Dorothy Perkins, pink; Flower of Fairfield, red; Goldfinch, cream white; Tausendschon, pink; Paul's Scarlet climber, and the bright red Climbing Rose of Sharon.

Throughout the season under such conditions.

Recipes For This Week

(By Betty Barclay)

FLUFFY LOAF CAKE

- 1 cup sugar
- 1/2 cup butter or other shortening
- 1 egg
- 2 cups flour
- 4 teaspoons baking powder
- 1/2 teaspoon salt
- 1/2 cup sweetened condensed milk
- 1/2 cup water
- 1 teaspoon vanilla.

Cream together sugar and butter until light and fluffy. Add egg, slightly beaten. Sift flour, add, measure, add baking powder and salt and sift again. Blend together sweetened condensed milk and water and add alternately with dry ingredients to butter mixture. Beat until smooth. Add vanilla. Bake in greased loaf pan (8 by 4 by 3 inches) or square pan (8 by 8 by 2 inches) in moderate oven (375 degrees F.) for 40 minutes or until done.

SALMON MOLD

- 1 package lemon-flavored gelatin
- 1 pint warm water
- 3 tablespoons vinegar
- 1/2 teaspoon salt
- 1/2 cup flaked salmon
- 1 cup cooked peas, fresh or canned

1. Soak gelatin in cold water. Dissolve gelatin in warm water. Add vinegar and salt. Pour small amount of gelatin in bottom of loaf pan. Chill until firm. Arrange thin layer of horse-radish on gelatin, then layer of salmon, another layer of horse-radish, and another layer of gelatin. When slightly thickened, add peas. Chill until firm. Add carrots and another layer of gelatin. Chill until firm. Unmold and cut in squares. Serve on crisp lettuce. Garnish with mayonnaise. Serves 6.

Medical Service By Radio

To Be Inaugurated By U.S. Coast-Guards On Great Lakes

The invaluable service rendered on the Great Lakes by the United States Coast Guard fleet is to be advanced another step, according to reliable information.

Emulating the service of the Coast Guard on the sea coast in furnishing advice on treatment of ocean sailors stricken or injured, the Coast Guard is now prepared to offer a similar service on the Great Lakes.

The radio equipment of the Coast Guard stations at Wilmette, Ill., and Cleveland, and the fifteen vessels assigned to the Great Lakes, will be available for such emergencies and commercial radio companies have agreed to co-operate in transmitting messages without charge.

Marine hospitals along the lakes will furnish advice for the treatment of sailors injured or ill while away from port.

To Meet In Vancouver

The next annual convention will be held in Vancouver, delegates to the Canadian Authors' Association in session at Montreal decided. Mrs. Hamar Jackson, of the Pacific coast, will preside.

Vancouver will celebrate its jubilee next summer and delegates would be able to see the celebrations.

Three million square miles of the earth's surface is as yet unexplored; it lies beneath the waters of the Pacific ocean.

Electrification of railways in the Rand of South Africa will soon start.

Keeping Up Record

The Jersey cow "Brampton Basilius," owned by B. H. Bull & Sons, Brampton, has recently completed another large milk-producing record. Commencing the new record at seven years of age, she produced in 365 days 19,119 pounds of milk; 1,251 pounds of fat—average per cent. 6.54. The previous record of this cow was 19,012 pounds of milk; 1,313 pounds of fat—average per cent. 6.906.

Old Golf Club Member: "Well, what did you do it in?"
New Member: "Seventy-six."
Old Golf Member: "Very good indeed."

New Member: "Yes, and tomorrow I'm going to play the second hole."

The Navajo Indians believe that a "spider woman" taught them the art of weaving, and for many years every Navajo woman weaves a spider-hole in the centre as a tribute to her.

MISS ALADDIN

By
Christine Whiting Farmer
Author of
"One Wide River To Cross"
"The Unknown Port," Etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge.

Now Go On With The Story.

CHAPTER V.—Continued

"But she had on silk stockings, Jack, and high-heeled slippers! They looked so incongruous with all the rest of her. Well, that'll be something to write home about. I wonder if we ought to go inside. Do you know, I—I feel sort of nervous. I wish whoever's coming for us would come and get it over with."

"Let's stay right here, this air's so marvelous. Do you suppose they often get such days in winter? Watch out, sis! Jack lowered his voice. "Catch onto the old dame in the fireman's shirt!"

Nancy smiled, eyes following her brother. A white-haired woman had just emerged from the station. She wore a broad-brimmed black felt hat much like a man's, while her long black cape being unfastened, revealed a simple house of flanneling. Her feet were clad in stout, black, laced boots, above which an inch or two of cotton stocking met a dark cloth skirt. An eccentric figure, taken as a whole. "And yet," Nancy whispered as she passed them hurriedly, "she has the air of being a real lady."

"Yeah," he admitted, "but I bet she's a crank of some sort, just the same. You know, what they call a—character. You'd think—"

Jack paused. The eccentric lady had turned and was approaching rapidly. "I'm looking for two young people by the name of Nelson," she said crisply. "Have I found them?"

"The question was as unique as the woman; but in that moment her somewhat mannish countenance was lighted by a contagious smile. Jack actually grinned, while Nancy responded quickly: 'It looks as if you had! Did Cousin Columbine send you to meet us?'"

A quick nod answered her. "I dare say you're hungry as two bears, and so am I. Come in and eat. These Eastern trains always arrive at meal times."

Still talking, she led them toward the station restaurant, and motioned to seats at the counter.

"No use in paying a dollar for a dinner when you can get a hot roast beef sandwich for fifty cents. Do you like roast beef? In my opinion there's nothing better. Do you want coffee? They say it's bad for people but I've drunk it every day for more than fifty years and am still able to get about." She smiled at the waitress, and not giving the young people a chance to answer, ordered: "Roast beef, sandwiches, coffee, lemon meringue pie for three, please; and take your time."

Struck dumb by this breezy individual, Jack stifled a smile and gave his sister a disconcerting nudge. Their escort had rung her cap on a nearby hook, and was a noticeable figure in her broad felt hat and scarlet middy. People looked at her, mildly amused; but there was nobility in her weatherbeaten countenance, and her smile was winning.

Lunch was quickly served, and there being no privacy at the counter, was consumed in silence save for a few questions regarding their journey. As the train pulled away from the station, both boy and girl turned to watch it, feeling a subtle, regretful twinge, as if some good friend were deserting them; and as Nancy resumed her meal their companion asked: "Borry to see the train depart without you?"

"I suppose I am," replied the girl, and added at this unexpected insight of her mood: "You see, it makes me feel as if the last bridge behind us was burning. Everything's so different from Massachusetts, and not knowing Cousin Columbine at all I'm silly enough to be a little nervous."

The woman smiled one of her nice smiles. "You needn't be. I don't think you'll find Columbine Nelson hard to live with."

"Have you known her long?" asked Jack, hoping to secure a bit of light on the character of their unseen relative.

"All my life. She was born at Pine Ridge seventy-odd years ago in a covered wagon."

"I dropped her at the Court House two hours back," he stated. "I saw that cop give you an admiring glance, Miss Columbine."

"Admiring?" Columbine Nelson smiled contemptuously. "There's more likely he was thinking: 'There's that old freak come down from Pine Ridge again.' Stop at the Cash and Carry for a box of canned stuff, Mark; and then head for home or Matthew will get there first and not know what to put the luggage."

"Can't Aurora tell him?"

They had turned into a street that faced the mountain, from which Nancy could hardly take her eyes.

"Not Aurora Tubbs." Cousin Columbine was saying. "She's so flustered at the idea of having company that like as not she'd have him put those trunks in the bathroom. We have a bathroom, Nancy, which no doubt you'll be relieved to hear. There's only one other in the village, and that's in a summer cottage belonging to a rich old man from Oklahoma. I went to the extravagance in 1914, just before the great war started over in Europe. I remember the date because I was christening the tub when the news came, and Aurora (her sister married a German, Otto Weismann, an epileptic) was away."

"It was?" retorted the old lady. "I called back: 'Keep still, Aurora. This is the first tub bath I've had since my mother washed me in a tin dish pan with only a covered wagon for privacy, and I wouldn't cut it short. If the whole German army was on the lawn! I could tell they was mad by the way she thumped downstairs, but she got over it here. I put on my clothes. Here comes Matthew now. Slow down. I'm going to stop him.'"

She signalled wildly, and a truck driver, who had been through the village, stopped. "The truck started to remove his hat, found he had none on, and blushed furiously. The truck emitted a sort of groan."

"If I reach home first, Matthew just sit and wait till we get there," ordered Miss Columbine. "You can tell Aurora I said to give you a slice of chocolate cake. And this is as good a time as any to make you acquainted with my cousin, Nancy and her brother, Aurora. They're coming up the pass and lose those trunks over the edge, will you? I dare say they're valuable, and I don't trust your driving as I do Mark's."

"Yeah," responded Matthew nervously. "Pleased to meet you. I'll be careful, and I'll drive them right."

He reached for his hat again, found it still missing, blushed redder, and started the truck with such a jolt that empty milk cans careened drunkenly in the rear. Such confusion amused his brother, and a quiet laugh escaped Nancy. She said: "He's really awful, isn't he?"

"Born that way," responded Cousin Columbine. "And so good looking!" observed Nancy.

They had stopped at a traffic sign, and the driver turned his head a little to say over his shoulder: "The family beauty."

"Nancy couldn't restrain a giggle, and Jack laughed outright; but Cousin Columbine remarked severely: "If you expect me, or anybody in Pine Ridge, to contradict you, young man, you'll be disappointed. In my day it wasn't considered modest to fish for compliments. The green light's on, boy. Why don't you get along?"

"Too crused to move," he told her, and proceeded to start the engine as quietly as the age allowed. "I'll park somewhere on a side street, Miss Columbine. There's no space in front of the Cash and Carry; but I'll walk over and get your box. It's only half a block."

Eager to stretch his legs, Jack offered assistance; and as the boys strode off the old lady remarked critically: "Jack's thin, isn't he? Grown too fast, most likely, and been cooped up in school. A year in the open will do wonders for him."

"Nancy thought, with sudden consternation: "A year! Does she expect us to stay that long?" but managed to answer: "That's why Mother let him come. The doctor said he needed outdoor life more than a diploma."

To Be Continued

Calgary Teachers

Under a new contract men school teachers in Calgary will be paid \$100 per year more than women grade teachers. Men teachers, the school board reported, have more work to do than the women. When the fall term starts, September 1, teachers may have to take a temporary percentage reduction.

When Canada goes migrate, the more powerful birds take turns leading the flight.

Lighting Killed 245 People In Yugoslavia Last Year

All records for deaths from lightning were broken last year in Yugoslavia when no less than 245 people were killed and several hundred seriously injured by it. It is shown by figures just issued.

During the same time several thousand sheep and many hundreds of horses and cows were also killed by lightning.

Most of the deaths occurred among peasants working in the fields. In one case, a man and his two sons were being mowed, their oxen wagon standing near. Lightning killed both the youths, stunned the father, killed both oxen and burned up the cart.

In the Shariar mountains 200 sheep which were sheltering from the rain beneath a huge oak were all killed by one terrific flash of lightning.

Near Kragujevatz lightning struck a man driving a two horse cart and killed him. The horses were unhurt and made their way to the village. The man remained sitting bolt upright on his seat and showed no visible sign of injury. It was not until the horses brought him to his home that his wife tried to wake him and found him to be dead.

Confuses Homing Pigeon

Radio Waves Can Make Bird Forget Its Way

The mechanization of armies has reached the homing pigeon, and in the next war he will be out of a job. The favorite carriers of spies' communications will be no use hereafter, for scientists have discovered how to make the homing pigeon forget the way home.

Army officers performed in the Loire Valley recently the experiments that showed how to stop the homing pigeon. They released a flock of birds, which rose, circled in their usual fashion, and then started in a beeline for their dove-cotes.

And then radio sending stations directed a powerful stream of Hertzian waves toward them.

The pigeons hesitated, swerved, and then began to turn in narrow circles until exhausted, they came to the ground.

A barrage of wireless waves, army engineers said triumphantly, is all that is needed to keep pigeons from crossing the lines and to induce them to come to truce and deliver up their secrets to the wrong side.

Puts Blame On Buffalo

Monarch Of Plains May Have Caused Prairie Burn-Outs

Large areas of land across the three prairie provinces are reported lost to productivity and the finger of blame is being pointed at the monarch of the plains may have been the primary cause of "burn-outs" common over a large area in southern Saskatchewan, Dr. J. Mitchell, University of Saskatchewan soils department, suggests.

The immediate cause was not fire, he believes, but wind which carried away the friable, easily pulverized surface soil down to the tough, compact subsoil which is quite infertile. The sod was destroyed and the soil began to blow.

The trek of the Royal Northwest Mounted Police to Alberta in 1874 recalled reports which described "the rolling plains everywhere trenched and rutted by the buffalo." There was plenty of buffalo meat for the men, but the horses faced starvation.

Tree Provides Food

Produces Nuts Which Look Like Eggs When Cooked

A rare tree providing food is the property of George Grant, a resident of Somerset Parish, Bermuda. When he is short of eggs to accompany his morning bacon, he goes into his garden and picks one from a tree. The tree bears a fruit, the size and color of a pomegranate. The fruit bursts open when ripe and "lays" a nut about the size of a hen's egg yolk. Mr. Grant cooks this for five minutes when it is a beautiful golden yellow. Garnished with white sauce it looks exactly like a hard-boiled egg. Mr. Grant is the only man in the colony with such a tree. It was brought there years ago by his father. It is a native of Africa, where it is called the Akee.

In exploration days, ten or twelve names were given to the great Mississippi River by different men who saw different parts of it.

He gives best who gives without waiting.

Science Aids Police

Criminals Can Be Convicted Beyond Shadow Of Doubt

The modern Sherlock Holmes uses science instead of deduction. With the aid of microscopes, powerfully lensed cameras, and a whole laboratory full of apparatus, detectives of to-day can convict criminals beyond a shadow of doubt.

The Nottingham Criminal Investigation department in Britain's best. It beats even Scotland Yard, for Nottingham has the only force in a country which includes a biologist, a physicist, a chemist and a microscopist, while Scotland Yard has not even got a laboratory.

Captain Athelstan Popkiss, chief constable of Nottingham, described some of the triumphs of his scientific crime investigators in the Police Journal.

"The captain has introduced in Nottingham the system of preserving accurate casts of instrument marks of criminals, a system widely used in Vienna."

"The incision made by the house-breaking instrument," he wrote, "is filled with a composition used by dentists and this is pressed in firmly so that the smallest splintering of wood and the faintest instrument mark is impressed into it. The composition then is allowed to harden, after which it is used as a negative from which a positive is made by running in liquid plaster. The same system is used in connection with footprints."

THE RHYMING OPTIMIST

By Aline Michaelis

GREAT JOYS

Laughter is for little joys, Childhood's thoughtless mirth, All the bubbling merriment Of this whirling Earth.

Words are for the joys that last But an hour or so, Only on a sudden, light Dazzling to the eyes, Only for an instant, wings soaring through the skies!

But the great joys; Silence comes Hand in hand with these; Speech could have no part to play In their mysteries; Only on a sudden, light Dazzling to the eyes, Only for an instant, wings soaring through the skies!

Award For Physicians

Annual Recognition For Canadian Doctors For Notable Achievements

Establishment of a "Victoria Cross" for Canadian physicians was voted by the council of the Canadian Medical Association, meeting in its 66th annual session with the 76th annual session of the American Medical Association.

The award, to be known as the Frederic Newton Glaberson Starr medal, will be available annually to a member of the Canadian Medical Association for achievement in the field of medical science.

It will be awarded to the doctor who, according to Dr. T. C. Routley, general secretary of the association.

Dr. Starr was an outstanding member of the association for 40 years, and during that time devoted himself to the development of the society. "In honoring him in death the association honors itself," Dr. Routley said.

Heavy Exports From Western Canada, Shown By Report

More than 1,000,000 bushels of Canadian wheat were shipped from Western Canada to the United States during the 13 months ended April 30, 1934, according to a return tabled in the House of Commons by Hon. R. C. Matthews, minister of national revenue. The information had been asked for by John Vallance (Lib., South Saskatchewan).

Manitoba and Saskatchewan were the heaviest exporters of barley, rye, wheat, oats, hay and straw to the United States in that period, with Alberta and British Columbia sharing to a small extent.

Figures for the year are as follows: Barley, 265,687 bushels; rye, 1,134 bushels; wheat, 1,061,504 bushels; oats, 50,942 bushels; hay, 41,109 tons, and straw, 56,220 tons.

Three per cent. of the oil extracted from a whale is obtained from the tongue.

Keep Record Of Graduates

Careers Of Alberta's Commercial Students Followed Up

Business men of Alberta, who seek university graduates for their office or field staffs, will be aided by the University of Alberta. Under the direction of Dr. W. C. Wallace, principal leading firms will be given information about the qualifications of graduates seeking a commercial course in life.

Investigation into careers of the university's school of commerce graduates resulted in reports on 97 of the 127 men and women graduated from the institution since it started in 1923. They are employed in Alberta, Toronto, Vancouver, the United States and one in Honolulu.

Some have taken up teaching; others are engaged in secretarial work; in the Canadian trade commission offices and in general commercial fields. One graduate took up farming.

The survey showed that only seven of the 127 graduates had married since leaving the commercial school.

Vimy Pilgrimage

Lady Haig To Attend The Vimy Memorial Unveiling

That Lady Haig will be present at Canada's unveiling of the War Memorial at Vimy next July was announced today by Brigadier General Alex Ross, Dominion president of the Canadian Legion.

"I am so grateful to you for your kind letter which has reached me regarding the Canadian Pilgrimage in 1936," wrote Lady Haig. "It will be a wonderful gathering to unveil that beautiful memorial, and I should feel much honored that the members of the Canadian Legion of the British Empire Service League have allowed me to accompany them."

Canada's Peace Army, registration to date is now over a thousand and expected to reach twenty times that figure, will attend the unveiling of Canada's War Memorial at Vimy Ridge in July of next year in the presence of representatives of the British and European as well as Canadian and United States governments.

Rewarded With Fortune

Lonely Bachelor Leaves Little Nurse Home And Money

Because she looked after an old bachelor when he was dying, the 15-year-old daughter of a family at Circular Beach, B.C., has now a fortune of over \$20,000.

For five months Benjamin Muhler had been sick. Every day the girl would go from her home, close by, to the small house of the bachelor and look after him.

A short time before his death the bachelor told his little nurse that he would leave her his house and two acres of land on which it stood. He never told her of the fortune that was in store. In fact, no one in the district thought that he had any money.

When the old man died and was buried, the will was read. His whole estate, which included the house and grounds and \$20,000, was left to his little nurse, who is the oldest of five children.

A BARBER WHO HAD RHEUMATISM

Tells How He Carried On

A barber who had been "a martyr to rheumatism" writes:—

"I have been a martyr to rheumatism for some ten years. For five years I was so affected that it was with the greatest difficulty I was able to carry on my business. I may say I am a barber by trade. After having tried numerous remedies, I was finally advised to try Kruschen. I am pleased to say that after having used Kruschen for some twelve months, I am now freer from aches and pains than I have been for some ten years. In fact I consider I am rid of rheumatism, thanks to Kruschen Salts."—W. M.

Two of the ingredients of Kruschen Salts are the most effective solvents of uric acid known to medical science. They swiftly dull the sharp edges of the painful crystals, then convert them into a harmless solution. Other ingredients of these Salts have a stimulating effect upon the kidneys, and assist them to expel the dissolved uric acid through the natural channel.

Little Helps For This Week

"He health the broken in heart and bludgeoned by their wounds. He telleth the number of the stars and calleth them all by name. Psalm 147:3-4.

Teach me your mood O patient stars. Who climb each night the ancient sky, Leaving a space no shade, no scars, No trace of age, no fear to die.

Look up to the heavens and the quietness of the stars would seem to reproach you. "We are safe up here" they seem to say, "we shine fearless and confident, for the God who gave the primrose its rough leaves to hide it from the blast of uneven springs hangs us in the awful folds of space. We cannot fall out of His hand. Lift up your eyes on high and behold: who hath created these things that bringeth out their heat by number? He calleth them all by names. By the greatness of His might, for He is strong in power, not one faileth."

Success In Business

Depends Very Largely On How Hard One Works

There is altogether too much nonsense talked about business. The world is full of successful men who can tell others how a business should be operated but who have never been able to make a success of one themselves. To conduct a business successfully three things are essential: money, ability, and a tremendous capacity for hard work.

It is the last of the three which contributes the greatest part to the success of a business, but it is a wise combination of the three which provides work for hundreds of thousands of men and women all over Canada.

British Film Stars

Leave Hollywood In Compliance With Immigration Regulations

Foreign born film players have to watch the United States immigration requirements closely. Two of them, Thomas Clark and Gerry Marco, English, have left Hollywood.

Clark, who appeared in "The Barrels of Winpale Street," and Marco, who played in "Clive of India," declared before they left they were going voluntarily. They had been accused of overstaying their visitors' permits.

The Romans sited their cities to keep industries out of central areas, and to limit height of buildings.

NEW PATTERNS ON Needlecraft

NOW AVAILABLE

ON another page you will see the first of the Alice Brooks Needlecraft Patterns. They will include everything about knitting. Hot press patterns, etc., as time goes on. We hope you will like this feature and the patterns are only 20c each with full instructions.

HEALTH MEANS CHARM AND HAPPINESS

Sparkling eyes and smiling lips speak of health and vitality. Clear skin attracts. The healthy active girl is both happy and popular.

Perhaps you are not really ill yet when the day's work is done you are too tired to enter into the good times that other women enjoy. For extra energy, try Lydia E. Pinkham's Vegetable Compound. It comes up your general health. Gives you more pep—more charm.

Remember that 99 out of 100 women report benefit. Let it help you too.

Mark Adam laughed as he swung into the driver's seat.

THE CHURCH OF ENGLAND IN CANADA

Diocese of Calgary
St. Cyprian's Church, Lacombe
Incumbent: Rev. T. R. Chapman
Licensed Lay Readers:
Messrs. E. H. Jones and A. T. Enslip

Organist: Mrs. L. D. Wright
Friday, 7:30 p.m. Choir Practice.
July 7, 3rd Sunday after Trinity
10:00 a.m. Sunday School.
11:00 a.m. Morning Prayer.
7:30 p.m. Evening Prayer.
TO BE KEPT IN MIND: It was reported to the Parishioners on Sunday, June 30th, that the "St. Cyprian's Church Restoration Fund" now stands at \$502.00 in Cash and Pledges. Will you, as a Member, Adherent, or Friend of the Church, help us to swell the figures of this Special Fund.

Spruceville News

Don't forget the U.F.A. picnic next Tuesday, July 24th at Shelving's Beach. Dinner served at 12:30. A good program of sports will be arranged. Everybody welcome. Come and enjoy a good day.

Mr. W. H. Marshall left for California last week for a visit with his mother.

Mr. and Mrs. C. C. Burton attended the Palmer-Monch wedding at Bentley last Thursday.

The "True Blues" meeting will be held at the home of Dorothy Drader on Thursday, July 11th. Roll call will be answered by an autograph verse.

A number from this community attended the Sports at Rimby on Monday. The Lacombe District Band (attired in their new uniforms), furnished the music for the day, and all report a good time.

Mrs. Dancock and Billie of Calgary are spending the week with Mr. and Mrs. Sam English.

Mrs. Laura Young is having a new home erected this summer, and the cement is being put in this week.

Mrs. W. Smith of Rosetown, Sask., is visiting her daughter, Mrs. W. R. Barker.

Mr. and Mrs. Sam Coverdale and daughter, Florence, of California, are visiting friends in Lacombe; also Mrs. Marshall and family.

Dance at Joffre

Be sure and attend the big dance at Joffre tomorrow (Friday) night. Large crowds have been attending these dances which are held every two weeks. You are sure of a good time at Joffre so be there tomorrow night.

Bob Paulsen and his six-piece Dance Orchestra supplies the music for these popular dances. Come and have a real evening of dancing.

Admission: Gents 40c.; Ladies free.

BORN
At Lacombe, on Saturday, June 24th, to Mr. and Mrs. Lawrence Campbell, a son.

Bob Paulsen and his six-piece Dance Orchestra will play at Joffre tomorrow, (Friday) night.

THE FIELD DAY

About one thousand people attended the Shorthorn Field Day at the Experimental Station yesterday. A full report will appear in next issue.

AT THE AYALON

"GREAT EXPECTATIONS"

"Great Expectations" comes to the screen with the real Dickens flavor untouched, right out of the pages of one of the most human absorbing and dramatic novels conceived by this greatest of English novelists, an ever-living classic of literature for all time. The story of "Great Expectations" will never grow old. It is just as fascinating and thrilling today as it was when Dickens wrote it, almost a hundred years ago, in his beloved house of Gadshill. The story is full of descriptions of the countryside surrounding his home, of the English lanes he loved so well; but it is also vivid with scenes of the London of his day, for Dickens was a great cosmopolitan figure and could write of that great city and its people with more understanding than any writer has been able to do.

One of the most interesting scenes in "Great Expectations" is the Cheapside Inn, "Lily and the Swan." The various signs on it, such as "Coffee Room," "Coach Office," etc., were faithfully copied from books, such as "Crackanthorpe's Days of Dickens" and actual places in which Charles Dickens himself stayed.

The inn itself is of the hotel variety and is not to be confused with the common English "pub." The "Coffee Room" in such inn was always the rendezvous of the better class, while the lower class took their drinks in the "tap room," as it was called. Quite often, the post office was part of the inn, as was also the booking office for coaches in those days.

So much attention was paid to getting the proper Dickensian flavor by Universal in the making of this film, that hardly a detail was overlooked. For example "Jaggers' home; where a great deal of the action in the story takes place, is dignified in the extreme, the furniture suiting perfectly its decidedly massive master. The selection of Chippendale and Hepplewhite furniture, the pieces of old needlework on the walls and chairs, and the "fine sporting printer" the dumb waiting table, silver, etc., all go to make up a most interesting and realistic picture.

COMING—Double Feature: "Satanstoe Quest" and "Student Tour," July 11, 12 and 13.

ALBERTA NEWS

Oil Production
Oil production in Alberta to the
end of May was 417,108 barrels,
compared with 547,292 barrels for
the first five months of 1934.

Junior Farmer Camps
As a result of special grants made
this year by the federal department
of agriculture, junior farm club
camps will be held at seven exhibi-
tions in Alberta this summer, under
direction of the Alberta department
of agriculture and the various exhibi-
tion associations. These camps
are to be held at Edmonton, Calgary,
Lethbridge, Camrose, Vermilion,
Vegreville and Red Deer. Already,
many applications have been received
from farm boys and girls to at-
tend these camps.

Coal Commission
Personnel of the Alberta Coal
Commission, to probe the whole coal
mining situation and conditions sur-
rounding same, will be named within
the next few weeks. Hon. George
Hoadley, minister of Trade and In-
dustry, announced on Friday. He
had previously announced that Sir
Montague Barlow, noted British en-
gineering authority, would head the
commission and would arrive in
September to commence the inquiry.

Survey Gas and Oil Areas
Making one of the most important
drives in the history of the west in
search of oil and gas prospects, four
geological survey parties are being
sent out from Edmonton this season
to map and make geological studies
of an area of 40,000 square miles
extending east from this area to
Battleford, Sask. Dr. G. S. Hume,
of Ottawa, will have general super-
vision of the work. One party which
will operate near Edmonton will be
under Dr. R. L. Rutherford, of the
department of geology at the Uni-
versity of Alberta, while Dr. P. S.
Warren, also of the department of
geology here, heads a party that
will operate in the Wainwright dis-
trict. Another party under Dr. G.
H. Crickmay, a graduate of the Uni-
versity of British Columbia, will
cover the Vermilion district, while
the fourth, under C. O. Hage, of the
University of Saskatchewan, has
been given the region between Lloyd-
minster and Battleford. Such well-
known producing fields as Ver-
milion with its extension into the
Kinross area, Fabyan, Wainwright,
and the new district of Lloydmin-
ster will be covered in the season's
program which will be carried on
until the end of September. In-
formation also will be collected in
regard to water wells which were
bored, particularly when they are on
a common "horizon," said Mr. Hume.
National Parks Open
Alberta's national parks have
opened for the 1935 season, and heavy
regulation is expected. Improve-
ments are being made in all the
parks, particularly at Banff, Elk Is-
land and Jasper.

LIBERALS WIN N.B.

Saint John, N.B., June 27—Lib-
eral tide that swept Nova Scotia
and British Columbia in 1933,
spreading to Ontario and Saskatch-
ewan last year, flooded New Brun-
swick today with a turnover unpre-
cedented in the history of this province.

The smashing victory of 43 Lib-
erals, including their leader, A. A.
Dyball, left the Conservative party
with only five seats in the New Brun-
swick house. Premier L. P. D. Tilley
and every member of his cabinet
met defeat. From a total of 14 at
dissolution, membership of the
former opposition has been increased by
29.

The handful of Conservatives who
will face more than two score Lib-
erals across the legislative floor are
Hon. F. C. Squires, speaker of the
last house; G. W. Perry and E. W.
Melville, elected in Carleton, and
Robert McAllister and A. C. Smith,
elected in Saint John county.
Defeated government members are
Mr. Tilley, premier and minister of
lands and mines; Hon. W. H. Har-
rison, attorney-general; Hon. Lewis
Smith, minister of agriculture; Hon.
G. H. I. Cockburn, president of the
executive council; Hon. H. I. Tay-
lor, minister of health and labor;
Hon. D. A. Stewart, minister of
public works; Hon. A. J. Leger,
provincial secretary-treasurer; and
Hon. E. A. Reilly, chairman of the
New Brunswick electric power com-
mission and minister without por-
tfolio.

Leading a campaign for the first
time, Mr. Dyball polled the largest
vote in Kent. Mr. Tilley, contest-
ing his old constituency of Saint
John City for the first time as pre-
mier, and the attorney-general went
down in the same riding.

The Liberal sweep was so complete
nine Conservative candidates lost
their deposits in Gloucester, Kent
and Madawaska. Two independents
in the latter constituency, only one
where straight Liberal-Conservative
fighting did not prevail, also met the
same fate.

Among defeated government can-
didates in Northumberland was Miss
Frances L. Fish, first woman to seek
a seat in the New Brunswick legisla-
ture. She led the Conservative vote.

Dr. W. F. Roberts, successful on
the Liberal ticket in Saint John city,
is a former minister of health for
the province. When appointed to
that post in 1918 he organized the
first governmental department of
health in the British Empire, and
much of the general public health
legislation since then has been based
on his work. He was defeated when

the Conservatives swept the province
in 1925, and did not enter the field
in 1930.

Liberals were out in front from
the time returns began pouring in.

Vacation Days

That happy period in childhood, the mid-summer school holidays, is past at hand. With shouts of joy, laughter, and on running feet the boys and girls of Canada will announce to all the world "School's out!" and they will lose their book bags to be forgotten, for a couple of months.

In these latter days much is heard of shorter working hours, more leisure for the workers of the world, and all kinds of proposals are advanced as to how those leisure hours may be spent in order that they may prove a blessing rather than a drawback in the development of a better type of citizen; in order that they may add to the pleasure and true enjoyment of life rather than tend towards pure idleness and even shiftlessness.

Now, with two months of absence from school for their children, what are Canadian parents planning for these energetic boys and girls, to keep them out of mischief and to make this vacation time freed from study and work a period of health and happiness, and an asset which will prove of value in better health, clearer minds, and a most wholesome outlook on life—in a word, prepare these citizens of the future to return to the school rooms with more vigor hence keen for another period of study and preparation for life?

Older boys and girls are already home from college, annual church conferences and assemblies have been held, nurses' graduation from hospitals are completed, examinations of all kinds are nearing an end, teachers, too, will be free of their duties, spring work on the farm is past, and in town and city the quiet time in business is at hand. Thus the older generation is able to devote more time and more thought to making these happy days of childhood a real joy and blessing not only to the children but to themselves.

And so the question arises, and ought to be faced, what can we do individually and collectively to make the summer vacation of 1935 a never-to-be-forgotten period in the lives and memories of Canada's boys and girls, your own boys and girls? It is a responsibility to be discharged, just as it is a pleasure to be derived by those who discharge the responsibility. And this combined responsibility and pleasure for parents, and unalloyed pleasure for children, should not be neglected this year especially, following as it does, so many years of economic depression and, for many in this west-ern country, disastrous crop failures and business reverses.

Fortunately, it does not cost much in money to give children a good time, a happy holiday. Fortunately, again, Canada is blessed by Nature with almost innumerable beauty spots for holiday purposes. There is not a province in Canada which does not abound in lakes, large and small; summer resorts and camping grounds are numerous, places to camp and picnic are to be found in easily accessible places. Full advantage should be taken of these to provide outings for the boys and girls, even though individual circumstances may make such outings of brief duration.

In summer time especially Canada is a land for out-of-doors. Get the boys and girls out into the open, and keep them there as much as possible. They are in school rooms and shut up in houses in the winter time for long months of the year; they need the health-giving properties of the sun throughout the summer holiday season, the clean, invigorating fresh air, the delights of forest and lake. Get them as close as possible to Nature in her happiest moods and most beautiful dress.

And make these vacation days of lasting benefit in other ways. See that the boys and girls are taught to swim. It is little less than a crime that so many Canadian boys and girls never learn to swim, and so many tragedies result which are so easily preventable. The art of swimming should be a part of every child's education. It is not only one of the best forms of exercise, making for the development of muscle; it is not only a source of great pleasure; but it is a preparation for emergencies that may arise in their own lives or in the lives of others.

Unconsciously, too, the work of the school room can be carried forward. Powers of observation can be developed and strengthened during vacation days spent in the open air, in the sunshine, neatness, orderliness, can be made a part of camp and holiday life, and accepted as a part of the fun, which will stand children in good stead in future years; initiative ideas in handicrafts, resort to simple invention to meet the lack of usual equipment at home—all these things mean a greater all-round development of character.

An elaborately organized holiday is not necessary, neither should much expense be entailed. Get out with the children and rough it for a while. They will enjoy it just as much, perhaps more, than an expensive trip or outing where everything is planned and arranged for them. To a large extent, the boys and girls should do a full share of the camp or holiday work. Properly organized and time systematically divided between these duties and the hours of play, boys and girls will enjoy and benefit from doing the camp chores.

Forget the motor car occasionally, and spend a day on a hike. Older hands know the delights and benefits of a walking tour or a day's hike, which Canadians have not learned to appreciate. Try one this year with your older boys and girls.

Think up other things and ways in which this holiday season can be made happy, healthful and useful. Vacation days present an opportunity to get closer to your children than is possible in the busier days of the year. It is an opportunity for you to study them; ascertain their weaknesses, or strength; gain their confidence in larger measure; learn of their ambitions, and as a result be in a better position to mold their characters along right lines, and check tendencies and habits, hitherto un-noted by you, which would prove a handicap to them, and a possible source of future worry and sorrow to yourself as well as to them.

Marriage in Finland

Canadian Bronco Buster Reported To Have Found Daughter Of Tom Mix

Ruth Mix, daughter of Tom Mix, and Harry Knight, champion Canadian bronco buster, eloped to Reno, Nev., where they were married, said a telegram from Knight received at Hollywood by Tex Austin, promoter of cowboy contests.

"We tied the knot to-day," read the message.

Miss Mix, whose father is famous for cowboy roles on the screen, formerly was married to Douglas Gilmore, an actor. Their marriage was annulled at Middletown, N.Y., in July, 1932.

Knight's home is at Banff, Alta.

Pupils in the middle grade of schools in China have been ordered to take military training.

New York City now has penny-in-the slot insurance.

Size Has Been Limited

Washington State Bans Double Decker Ice Cream Cones

The days of "double-decker" ice cream cones are over in the state of Washington—and are the kids sorry? Under a ruling of the ice cream code authority for the state department of agriculture, dealers have been warned that prompt action will be taken against any druggist or confectioner who gives more than two and a half ounces of ice cream in a five-cent cone.

A minor price war had resulted in the offerings of two scoops of ice cream in a five-cent cone by many retailers.

Problem For Astronomers

Mars, where weather extremes are almost an hourly matter and life-giving oxygen is virtually non-existent, has presented a new problem to the astronomers of this world by producing what seems to be snow out of season.

A HANDY POCKET TREAT

SWEETENS THE BREATH!

Lloyd's Insure Vimy Pilgrimage

Stress Necessity Of Making Early Bookings

The Canadian Legion announced to-day that Lloyd's of London, England, have insured the Vimy Pilgrimage, to be held in July of next year, against abandonment in the event of war, financial panic or other untoward events.

Bookings are pouring into the steamship companies. Hope is expressed by Legion officials that ex-servicemen realize the necessity of registering early in order to be certain of accommodation.

"It is difficult to impress a veteran with the idea of making a ten dollar deposit now when he knows he can pay the full hundred dollars later when the time comes," said Captain Ben Allen, Dominion organizer, to the press to-day. "Early bookings are necessary, however, so that we can get enough ships to take care of the thousands who intend going."

"And pilgrims only are going to be allowed to sail in this Peace Armada. Also we must arrange early for billeting accommodation and rail and motor transportation in France. The naval, military and civil authorities in France, Belgium and England are extending us every co-operation. It looks like Canada's year in Europe next year."

Two Montreal Doctors Received Presentation For Their Exhibit

The silver anniversary of the American Medical Association for exhibits judged entirely on presentation and not on experimental studies was awarded to Dr. David W. Mackenzie and Dr. Alexander B. Wallace of the Royal Victoria hospital, Montreal, for their exhibit on the relationship between lymph glands and infections of lower portions of the body.

A certificate of merit was awarded to Dr. Bebe J. Harrison of Vancouver, for his exhibit illustrating a new method of X-raying the body.

The association had a special commendation for the exhibit on folio Donne quintuplets by Dr. Allan Roy Dufour of Callander, Ont., and his brother, Dr. William A. Dufour of Toronto.

Held Up By Robin

Nesting Bird Delays Altering Of Hurd C.N.R. Sign

Plans to alter a huge electric sign fronting the Canadian National station in Winnipeg were thwarted out of consideration for a mother robin whose nest is attached to the letter "P".

Working of a new sign designed to replace the old had been carefully worked out. Electricians were summoned and all was in readiness to flash out the attractions of summer excursions. Then office workers who had seen the bird's nest, and accepted as eggs reported to officials, and it was decided, excursions or no excursions, Mrs. Robin must not be disturbed.

Meantime efforts were being made to work out a sign which would leave the "P" in its present position.

Large Weekly Output

Firm In Birmingham Ripens Bananas In Heated Rooms

Every week about 10,000 bunches of bananas are ripened in Birmingham, England, by gas. Forty ripening rooms are now in use at one of the large warehouses adjoining one of the main railway depots, and by means of a band conveyor bunches of green bananas are taken straight from the railway trucks to the ripening rooms.

The temperature in these rooms is maintained between 80 degrees and 85 degrees Fahrenheit, the heat being supplied by gas burners controlled by an extremely sensitive thermostat. After about a week's treatment the bananas are perfectly ripe, and are then graded for quality and size and packed into boxes of about 100.

Latest Life-Saving Net

Device For Use At Sea Was Successfully Tested

An ingenious life-saving net which experts state will minimize perils of the sea has been demonstrated at Cardiff.

The invention is a raft consisting of tubular cork bags made into a net lashed with rope. It is produced by a Cardiff ship-repairing firm.

It can be unrolled down a ship's side to serve as a ladder, or floated alongside foundering or burning vessels in conditions which would make the launching of an ordinary lifeboat impossible.

Orders have been received from liner and "tramp" firms. The device is expected to form the basis of a new industry.

A Full-Time Job

What are the functions of a lieutenant-governor? asks a constitutional writer. In Manitoba, says the Winnipeg Tribune, the duties start daily. Sundays included, somewhere around 8 a.m., and last frequently until the clock turns to a.m. of the following day. Not more than a thousand organizations of one kind and another have their eye on the governor as a prospective guest at one or more events.

STARS OVERNIGHT

Miss Vivien Leigh, nineteen-year-old British actress, who achieved fame overnight as a result of her acting in "The Mask of Virtue", in London, has signed a \$250,000 contract to make five films.

Major-General E. C. Ashton Of Victoria Receives Appointment

Appointment of Major-General E. C. Ashton, of Victoria, as chief of staff at headquarters, succeeding Major-General A. C. L. McNaughton, has been confirmed.

Gen. Ashton has been succeeded as officer commanding Military District No. 11 at Victoria by Lt.-Col. D. J. MacDonald, of Lord Strathcona's Horse (Royal Canadians). Lt.-Col. MacDonald has been promoted to the rank of colonel (temporary brigadier). His appointment and promotion is announced by the department of national defence.

General Ashton was formerly quartermaster-general at Ottawa. Brigadier MacDonald, a 1908 graduate of the Royal Military College, Kingston, Ont., has been employed recently in connection with unemployment relief projects administered by the department of national defence.

At the beginning of the Great War he was serving with the 29th Light Horse. In October, 1914, he went to England with Strathcona's Horse and continued to serve with that regiment until the end of hostilities. Twice wounded, he ended his war-time service in command of the regiment.

Captain Was Pleased

Answered SOS Call And Was Asked To Buy Fish

Captain Claus Stencken told a pathetic fish story when his liner Stuttgart docked at New York.

He had been constantly on the bridge for 48 hours because of fog and icebergs, and on the following morning he heard a succession of long foghorn blasts—the international distress signal, he said.

Since Captain Stencken had been informed that a French fishing schooner was feared lost off the Grand Banks he was naturally very concerned. Cautiously, the Stuttgart crawled through the fog and off her course on her errand of mercy.

A sailing vessel loomed ahead and she came through the fog identifying the ship as the reportedly missing fishing barkentine Madiana Chatelaine, of Bordeaux.

"Do you want to buy any fish," the voice asked Captain Stencken, who is a fish-hater.

Captain Stencken did not buy any fish. The Stuttgart arrived in New York a day behind schedule and the high pressure fish salesmanship was partly responsible.

Sports Rally For Deaf

Deaf people from many parts of the world will hold an international sports rally in London from August 17 to 24. Seventeen nations will be represented. Track and field events will cover the complete Olympic program and there will be events for women.

In addition the deaf people will swim, cycle, play football and lawn tennis.

The wife of a small farmer sold her surplus butter to a grocer in a village town. On one occasion the grocer said: "Your butter was underweight last week."

"Now, fancy that," said Mrs. Farmer. "Baby mislaid my weight that day, so I just used the pound of sugar you sold me."

Started Apple Industry

On tiny Belle Isle near Annapolis Royal, Nova Scotia, Pierre Martin planted several small trees 302 years ago, which he had brought to the new world with him from Normandy. This small plantation, the famous Annapolis valley apple industry arose.

Nature's Mineral Salts

Cleanse the system—purify the blood. Nothing better for rheumatism, kidney and liver. At all druggists—45c.

SASKAL

Butterfly Hunter

Man To Travel 4,000 Miles To Pursue Life-Long Hobby

At the age of 73 Walter Dannatt, a retired business man of London, will leave shortly to travel a thousand miles up the Amazon in pursuit of his lifelong hobby of butterfly collecting.

Mr. Dannatt has a remarkable collection of butterflies and moths, numbering more than 18,000, and he hopes to add to it considerably as the result of his new venture.

"I keep fit by cycling," Mr. Dannatt added. "I have had the same machine for 30 years and have traveled more than 150,000 miles on it. One week-end I covered more than a hundred miles."

"Before I bought my present machine I had the first safety bicycle in the country."

On the subject of his hobby, Mr. Dannatt said: "Some of my specimens come from as far as the Solomon Islands. The collector who secured them was repeatedly driven off by cannibals in attempting to land. He at last succeeded by brandishing a revolver."

Boosting Bay Route

First Vessel To Be Chartered For 1935 Season Is The Ashworth Of The Dalgleish Line

Announcing the Ashworth of the Dalgleish line is the first vessel to be chartered for the 1935 season, Brig. the On-to-the-Bay Association, at Winnipeg, forecast a record year for grain exports over the Hudson Bay route.

More ships would visit Churchill, Manitoba's northern seaport, this season than any season previously. General Patterson said. Judging from the numerous inquiries received from persons in different countries, General Patterson said many tourists would visit the port this year.

The Ashworth will leave England in time for the official opening of the Hudson straits and is expected to dock at Churchill shortly after the opening day, August 10. The Ashworth will bring cargo to Churchill from Newcastle, Antwerp and Liverpool.

Royal Military College

List Of Western Graduates, And Those Receiving Diplomas

Corporal Ian Mondelet Drom, Victoria, B.C., graduated from Royal Military College with honors.

Other Western cadets who graduated are: Nestor Gordon Dale Macalister, Regina, Cadet Edward Maurice Hodson, Rosthern, Sask.; C.S.M. John Alexander Hornbrook, Calgary; Cadet John Despard, Victoria; Cadet Murray Duncan Lister, Calgary; Corporal Ronald Edward Wilkins, Paddock, B.C.; Cadet George Ross Davidson, Castor, Alta.; Sergt. Robert Summers Stronach, Calgary; Cadet John Henry Desmond Barrett, Victoria.

The following will be awarded diplomas after satisfactorily passing supplementary examinations: Cadet Thomas Alfred McPherson, Victoria; Corporal William Carroll Patterson, Calgary.

For Anglo-American Amity

Eight Thousand Former Residents Of British Empire Hold Gathering At Los Angeles

Upwards of 8,000 former residents of the British Empire, enough to make a small city, picnicked at Los Angeles, California, in observance of the silver jubilee of King George.

The outdoor luncheon grounds of Lincoln park saw a gathering of people from all parts of the empire.

Frederic E. Evans, British consul and guest of honor, pleaded for Anglo-American amity and declared that at such a season of English rejoicing international ties should be even closer between former British subjects here and abroad. John Tappan, vice-president of the Sons of St. George, was another guest of honor.

Designed Cheap Car

Machine Built By English Engineer Costs Twenty Dollars

A streamlined car costing \$4 and doing 100 miles to the gallon has been designed and built by Mr. Howard Boyd, a 28-year-old engineer. The body has been made of ply wood with ash strungers, and an engine of 1 1/2 h.p. has been fitted at the back, giving an average speed of 27 m.p.h. The car, weighing 200 lbs. only, is started by winding a strap fastened round the steering wheel and pulling the strap after spinning top fashion.

New Story For Ripley

Here's one for Ripley, "Believe It Or Not," but it's a fact anyway. A. W. Youngblut, of Oxford County, Ont., found a large potato with others in his cellar that had started to rot.

But the sprout had turned around and gone into the potato again near the surface, coming out at the other end, extending for about two inches.

The use of big words depends on whether you enjoy hearing yourself or wish to be understood.

Alice Brooks Patterns

An Announcement Of Interest To Women

Women are busy these days plying their knitting and crochet needles turning out beautiful articles that vie for honors with their Grandmothers' efforts. Wherever you go—to test parties, bridge games or social gatherings—you see women wearing knitted suits, sweaters, dresses, and accessories that are paragons of elegance and good taste. They created them with their own hands in their spare time, they will tell you; and you ask yourself why you cannot do the same. You can. And you will either tailor and pay nothing or, if you are very happy to announce that we can offer the Alice Brooks Needlecraft Service to our women readers. A service exclusively of interest to women with artistic tastes. And what woman has not a taste for the dainty and artistic?

Dame Fashion declares that accessories should match. In line with this ultimatum, our new service will offer matching hats and purses. Gloves that can be crocheted to match that "best" dress, flattery up to the minute sweaters with matching coats for the winter, and two-piece knitted suits with exquisite tailoring and clever hand-finished touches that will make you the envy of all your friends.

Miss Brooks, creator of this service, also will provide designs for the needleworker. Quilt patterns in such lovely designs as Spring Fancies, Croquet Fan, Rainbow Square, Friendship Fan, luncheon cloths that will make your table fit for a king, ten towels to grace your kitchen. Everything imaginable for a home beautiful is included.

Alice Brooks patterns are clear, detailed and easy to follow. The precision with which each pattern is designed—the materials and color schemes suggested—the helpful instructions on finishing—all aid in the completion of satisfying work.

We have inaugurated this helpful service so that you may order a simple, fashionable new pattern directly from your home. Patterns cost only twenty cents each.

Girl's Ruse Fools Thief

Recovers Jewel From Robber By Clever Trick

A young woman in Shanghai, China, who refused to be alarmed when a thief snatched a pearl earring valued at \$1,000 from her ear recovered the jewel by a ruse as clever as it was daring. As he started to run away, the woman reached for the other earring and called to him: "Here," she cried, "you might just as well take the other one. I only paid \$250 for them." The robber, hurrying a stream of invective at her and all other women who were imitating jewelry, tossed the earring he had snatched into the street and left.

Tuberculosis Seals

Receipts Twelve Per Cent Higher Than In 1933

Receipts from the Christmas seal sale of the Canadian Tuberculosis Association were 12 per cent higher in 1934 than in 1933 it was reported to an association meeting at Toronto, Saskatchewan, New Brunswick, Montreal and Hamilton had notable increases.

Research awards to junior staff members in Canadian sanatoria and clinics, for 1934, follow: Dr. C. F. Bennett, Fort St. John; Dr. A. R. Boyd, Vancouver.

A Cleanly Court

"The Campbell's are coming" was a sitting song in Cobourg, Ont. the other day, says the Toronto Star Weekly. The Campbell police court is held in Cobourg, and on the bench was Magistrate W. A. Campbell, the accused was Thomas Campbell, and the police officer who laid the charge was D. Campbell of Campbellford.

Nearly every military term is French.

Little Journeys In Science

BROMINE

(By Gordon H. Quest, M.A.)

Bromine was discovered about a century ago by the French scientist Balard. The element occurs in nature as bromides, chiefly as magnesium bromide and sodium bromide, which are found in many springs and salt deposits. The Staatsfurt deposits in Germany and the salt waters of Michigan and Ohio are richest in bromides. Sea water also contains small amounts of bromides. Bromine is prepared commercially by the electrolysis of a solution of bromide or by treating solutions of bromides with the more active element chlorine.

In recent years the demand for bromine has greatly increased, due to its use in the preparation of a compound called ethyl gasoline. This compound is a constituent of ethyl gasoline. An effort is being made at the present time by scientists to obtain additional supplies of bromine from the bromides in sea water. Sea water contains about seventy parts of bromine in a million of water, which means that about 2,000 gallons of the water must be treated to secure a pound of bromine. To recover bromine from sea-water, a ship was equipped capable of recovering 100,000 pounds of the element per month. It has been reported that the trial trip of this vessel was quite successful, and as a result of this rather large scale experiment a plant has been built on the Atlantic coast for the extraction of bromine from the ocean. The success of this venture has suggested the possibility of extracting gold from sea water in a similar way.

Bromine is a dark-red fuming liquid with a very disagreeable odor. Bromine vapor attacks the eyes very painfully and produces great irritation when inhaled. It is about three times as heavy as water and is moderately soluble in water.

Bromides are compounds produced when bromine combines with other elements. Those of potassium and sodium are used in medicine as sedatives and in the preparation of silver bromide, which is used extensively in photography as the sensitive material on the plate. Bromine is also used in the preparation of important dyes. Considerable quantities of bromine are used in the manufacture of tear-gases, or lachrymators.

New Use For Potatoes

Outlet May Be Found For Canada's Surplus Crop

Millions of pounds of imported corn now used in the manufacture of a wide variety of food products could be replaced by Canadian potatoes, thereby using up the entire potato surplus of 7,000,000 bushels, a conference of experts called to devise new uses and new markets for potatoes was told. Such is the opinion of Dr. W. Galley, of the national research council, who made investigations regarding the possible use of potatoes in making starch foods. His inquiries led him to believe potatoes could be used in place of corn which had to be imported and that this method might provide an outlet for the whole of the present surplus.

In the past century, 11 species of foreign birds have been brought to this country and naturalized.

What Modern Engineering Could Do In Changing The Climatic Conditions

Hints of a "made-over" world, thanks to modern invention and natural science, were given at a recent meeting of geographical experts in London.

The talk was by Leopold Amery, former Dominion Secretary of State for Great Britain, who captured his audience's imagination by setting them upon a magic carpet and whisking them to far places at will. The first stopping place was amongst the foggy icecaps of Labrador. Here he had them look down at the narrow channel skirting the northern extremity of Newfoundland. He pictured to them what engineers there might someday do by diverting the straits of Belle Isle, thereby "diverting the Labrador icebergs, which now drift into the Gulf of St. Lawrence," thus "securing an earlier spring for the whole of eastern Canada."

The occasion of the meeting was the launching of the first issue of the Geographical Magazine, a new journal for the advancement of exploration and research. Scarcely had they time to imagine the vast added area of smiling forests that might thereby be created, when he whisked them off to Constantinople and showed them the narrow stream of the fast-flowing Bosphorus. This he suggested might some day be closed by a 200-foot high dam, behind which the water would gradually rise until there was restored "that great inland ocean which," once included the Black Sea, the Caspian and the Sea of Aral, almost to the Afghan border. "Neither of these enterprises," he said, "was from the purely technical point of view the powers of present-day engineering."

His carpet fluttered on and hovered next over the 6,000-foot high plateau of Abyssinia. Beneath was the 40-mile-wide Lake Tana. Beyond was the wide Blue Nile stream emerging from the lake to plunge into a 400-mile-long ravine. This, the traveller could see, lay amid mountain ranges towering a mile high above it on either bank. The Blue Nile flowed on a 1,000-mile course to join the White Nile at Khartoum. The damming of this gorge with infinite possibilities of crossed fertility for the already rich cotton fields of the Sudan and Egypt he described to-day as even "nearer to practical politics."

The magic carpet sped on faster still. The breathless voyagers were afforded a glimpse of vast swampy tracts of the Upper Nile that Mr. Amery indicated were capable of being drained. They saw from afar the ancient irrigation system of Mesopotamia that might some day be restored. They were shown the possibility of systematic colonisation with reindeer and musk oxen of the great prairie region of Northern Canada which their guide reminded them little deserved its present title of "Barren Land." They saw also the fertile clay belt round Hudson's Bay that might, he suggested, be drained and brought under cultivation.

Mr. Amery's carpet must have passed close in its flight, though it did not stop over yet other regions of little less magic possibility. There is the Dead Sea area in Palestine, hundreds of feet below the level of the Red Sea with which a new block of up-gorge still connects it. There are the 6,000,000 acres of "shottis" in Southern Algeria where the western desert of the Sahara is so deep below the level of the neighboring Mediterranean Sea as to make modern engineers dream of a day when they may be able to admit vitalizing water to now barren soil.

Would Help Dairy Farmer

England Thinking Of Establishing Milk Bars Through Country. Britain may soon be quenching its thirst at Milk Bars.

The idea comes from the Milk Marketing Board.

The board's vice-chairman, Ben Hinde, told farmers at Foulshill that milk bars "would enable the touring public to obtain for themselves and their children best nutritious refreshments."

They were contemplating establishing bars in many parts of the country.

Already schools of Britain have their "bars." Walter Elliot, Minister of Agriculture, inaugurated the scheme. Soon he may be "drawing" the first tankard to quench Britain's thirst—and help the British dairy farmer.—London Daily Mirror.

Canada's First Railway

Plans for the celebration of the 100th anniversary of the opening of Canada's first railroad are being formulated by the Canadian Railroad Historical Association, Montreal.

Canada's first railway was known as the Champlain and St. Lawrence Railroad and operated between La Prairie, Que., and St. Johns, Que. It was opened by Lord Gordon on July 31, 1836.

A school's bride, once used to punish talkative women, was sold recently in London for \$40.

Wealth In Siberia

Great Russian Gold Field Still Holds Vast Treasure.

The world's greatest treasure house of gold, the Lena fields in Siberia, despite 100 years of exploitation, still contain as much of the yellow metal as has been mined from it, a Soviet analysis has revealed.

Powerful electric dredges now are digging from the Lena fields thousands of ounces of gold each year. The exact production there is a state secret, but it is known to be in excess of the pre-revolutionary yield, about 18 tons annually.

The output of the Lena fields is one of the main sources for building up the Soviet gold reserve, now estimated at around 1,000,000,000 gold roubles, or sufficient to stabilize the national currency whenever the Soviet Government considers that desirable.

For many years during the Czarist regime the Lena fields were worked by crude, ancient methods. Thousands of exiles and convicts were employed in the mines. After the revolution, a foreign company was given a concession to exploit the Lena region.

In 1920 the Soviet Government began mining operations, introducing powerful electric dredges and modern methods of mining.

According to recent official estimate, some 750 tons of gold have been taken from the Lena fields during the last 100 years, and an equal amount still remains to be mined.

Awarded Silver Medal

French Regiment Honors Dog For Saving Mountaineer.

Betty, a three-year-old dog, and regimental mascot of the 99th Infantry Regiment at Paris, has been awarded a silver medal by the Council of Justice Towards Animals for saving the life of an injured mountaineer.

Members of the regiment were called out on March 9 to rescue a man who had broken his leg in the Alps. It was found impossible to bring him down without aid, so Betty was returning to the valley for help. The soldier dug him a shelter in the snow and left him the protection of his mascot.

By giving him the warmth of her body, and keeping him awake during a period of 18 hours when the temperature went down to 22 degrees below zero, Betty saved the life of the injured man.

The entire regiment turned out when Betty was honored. She listened to all the speeches with patient and understanding expression, but refused to be photographed, showing her teeth and growling whenever photographers approached.

Result Of Careful Thought

Crack Trains Are Not Named In Haphazard Manner.

Names for crack trains and steamships are not chosen in haphazard manner, but instead are the result of careful thought on the part of high officials of transportation companies, states Franklin Snow, well-known writer on transportation matters, in the May issue of the Canadian National Railways Magazine.

Mr. Snow cites the "million-dollar-moniker" of the Twentieth Century Limited as an example, adding that the names of the International Limited, the Maple Leaf and other famous trains of the Canadian National system identify their ownership to travelers without difficulty.

U.S. Indemnity

Canada Agrees To Pay \$350,000 In Settlement Of Damages.

The United States senate ratified a convention with Canada under which the latter agrees to pay the United States \$350,000 in settlement of damages in the State of Washington caused by sulphur fumes discharged from the smelter of the Consolidated Mining and Smelting Co., at Trail, B.C.

The sum would be for damages suffered prior to January 1, 1932. The convention also sets up a tribunal to decide whether any damage has been caused since that date and if so what indemnity should be allowed.

Had Ready Wit

Sir John A. Macdonald was not only an astute politician, but had a ready wit. One day in the House of Commons an opponent accused him of having stolen part of the political program of the other party. "Sir John has stolen the brains of the Opposition," he thundered.

In a flash Sir John arose to a point of order. "Mr. Speaker," he complained, "the honorable member has accused me of petty larceny."

Wrongly Named

Customer: "Do you sell hams, steam shovels, women's hats, iceless refrigerators, setting hens, lumber, ready-cut houses, new auto sport, spinach, fish bait, and that sort of thing?"

Merchant: "No. All we do is sell prescriptions."

Customer: "Then why do you call this a drugstore?"

"LAUGH, AND THE WORLD LAUGHS WITH YOU"

Britain continues to lead the world along the road to prosperity. The Jubilee festivities put enormous additional sums into circulation, and the latest trade figures show a substantial increase in exports.—News of the World.

Early Diagnosis Needed

Ignorance Is The Cancer Patient's Greatest Enemy, Says Speaker.

Only one-third of cancer patients who undergo treatment receive it in time to be cured, Dr. R. C. Davidson, deputy minister of public health for Saskatchewan, stated in Toronto.

The chairman of the Saskatchewan Cancer Commission, speaking before the Canadian Social Hygiene Council and the Toronto Health League, declared, "Ignorance is the cancer patient's greatest enemy."

Formation of a Canadian branch of the British Empire Cancer Foundation in conjunction with the King George V. silver jubilee cancer foundation was urged.

Neglect, lack of pain, failure to take the disease seriously, inability to pay for treatment, fear, were some of the reasons given by 200 examined in a Saskatchewan clinic for failure to be examined earlier.

Of 543 practitioners questioned, 124 had never seen a cancer case.

A Protective Agency

More children are coming into the Vancouver juvenile court since the general public is beginning to recognize it as a protective service rather than a punitive agency, said Judge Helen Gregory MacGill, its presiding officer, who was in Montreal to attend the sessions of the first Canadian Penal congress.

The ancient Egyptians practiced plastic surgery.

The SNAPSHOT GUILD

ENLARGEMENTS

Enlargements make ideal gifts for friends and relations.

Everything considered, snapshot-prints are a lucky lot. As we have seen, they have the edge on ordinary portraits in the matter of really personal, meaningful birthday or other types of greeting cards. And they have the means of creating gifts of exceptional charm and value.

These particular "mementoes" are the snapshot negatives from which beautiful enlargements can be made. If you haven't yet experimented with enlargements, now's the time.

In enlarging a picture you get not only a bigger, more realistic image, but the opportunity to select the best part of any negative for magnification. Suppose you have a good negative of the youngsters at play in the sandbox—a picture which their grandparents would be delighted to have, enlarged, as a gift. But suppose there's something incongruous—a wash on the line, a lawn mower or anything else that doesn't add a thing to the charm of the view—to the right or left of the children. With an enlargement, this extraneous feature can be completely eliminated.

Enlargements may be of almost any size. Any good negative, no matter how small, may be "blown up" to make a picture five or six times the size of the original. A sharp 2 1/2 x 3 1/2 inch film will easily give you a sparkling 8 x 10 inch enlargement.

A word about subjects for enlargements—particularly if they're to be used as gifts. Choose pictures that will mean something to the recipient. A shot of Fido trying to climb a tree? Or Cleo, the cat, belting a sister away at College, but it won't mean very much to Aunt Cynthia who doesn't care for either dogs or cats.

Some of the best enlargements we've seen have been landscapes—or seascapes. Mountains usually make good pictures.

A friend of ours makes a practice of getting informal shots of his friends which are enlarged and delivered to the various cronies as gifts. All of which stimulated his gift problem.

With the coming of summer you will be getting many pictures that will make beautiful enlargements such as a picture of grandmother in the flower garden, or sister standing in front of a tree filled with beautiful spring blossoms.

Opportunities for beautiful pictures are countless at this time of year, so go forth with your camera and get them.

JOHN VAN GUILDER

The Thoughtless Adult

Usually More Careless Than Boy About Camp Fire.

The current effort being made to educate the public in the importance and technique of building and disposing of camp fires will strike a sympathetic note among many citizens. It is a good work.

The automobile has transformed many a city-dweller into a camper. Governments, realizing this, have built roads that tap scenic wonderlands and virgin forests. Forest services have cleared trails for the hikers. To-day, as at no time before, the natural resources for recreation are open to the people's use. And abuse.

The boy in a well-organized camp is not the chief offender. He is taught how to build and care for fire. Enemy No. 1 of the forest is the thoughtless adult who leaves his camp fire smoldering, ready to be spread by a gust of wind or carelessly flips a cigarette or cigar butt aside.—Rotarian Magazine.

An Old Argument

It was thought worth while to cable half-way around the globe that Amelia Earhart, the aviator, pronounces it "tomayto." Why shouldn't she. The dictionary endorses that pronunciation and it is "potayto" why should it not be "tomayto?"

Need For Reform Of Immigration Laws Stressed At Social Work Meeting

Passing Of The Summer Kitchen

The Old Time Apprendage To The Average Home Is Fast Disappearing.

That blessed appendage to any house, the shed, has almost disappeared from the city. Like the ubiquitous bench of our childhood, its going is a loss for which nothing can compensate. The shed had its uses for all members of the family, for all its servants, when the family ran to servants. It was the summer kitchen, through which sweet airs blew across the spicy odors that the cook was combining at a table as large as many modern rooms; it was the place where small boys given to splashing as they supposedly washed behind their ears, were sent to take their summer bath; it was the place where wood was piled high for winter, the daring climbing up the precarious footing, or hiding there in the darkness when hide and seek was on the boards. The shed was also given over to Blue Monday, when the smell of soapuds was kept away from the house instead of rising to contaminate the house with onion- and-lavender scented air. The difficult starching and ironing rites of the past were performed there, an ancient stove, past the more delicate operation of baking, heating the great irons, as well as the water in which the clothes were washed and boiled. Not long ago we had the joy of entering one such shed, where there were baskets full of fresh clothes that had been dried on lines in the garden that remains from a more luxurious time, and an ironing board and an array of pots and pans upon the walls also brought memories of that spacious era when families sat and talked over the dinner table and the world had not begun to hurry.—Brude Broder in Toronto Mail & Empire.

Carrier Pigeons Unreliable

Manitoba Forestry Service Finds Their Work Of No Value.

Carrier pigeons have fallen from their high pedestal. In flight parlance they are termed a "bust" and many will be ineligible for re-employment with the Manitoba forestry service when summer air patrols zoom away over forest areas of the hinterlands.

Carefully conducted experiments last year revealed the best "homers" were more unreliable than temperamental humans. The majority would not fly at night and often they objected to fly or delayed a routine. They can be depended on only for short distances during good weather.

A few of the birds that made assigned runs in any time up to 24 hours will be retained. Many took much longer and their work was practically valueless. Sometimes they refused to fly or delayed a long time before taking off. Not a few failed to return.

Best travel records were flights of 150 miles in three hours, 100 miles in two hours and thirty minutes and 60 miles in one hour and fifteen minutes. A few will be used to report progress of fires and employed during forced aeroplane landings.

Glad To See Steamer

People On World's Loneliest Island Were Needing Provisions.

Seventeen-year-old Nancie Moore of Belfast, Northern Ireland, who joined the bark Neptune as ordinary seaman and was the only woman on board reported on the ship's arrival at Port Lincoln, Australia from Copenhagen, Denmark, that she had visited Tristan da Cunha, the world's loneliest island. The Neptune's visit was timely, as the islanders' provisions were getting low and they had no flour. Stocks were restored following barter. The islanders were eager to obtain shoe polish, laces, soap and clothing as well as food.

The island is suffering from a plague of rats which is causing much concern. The people of Tristan da Cunha had not heard of the royal wedding and eagerly inquired about the ceremony and dresses.

A Strange Request

Annuity English Couple Receives Depends On Lace Curtains.

If Thomas Buttcliffe or his wife decide to change the long lace curtains on the front windows of their home at Arbour street, Southport, England, for some other kind, the decision will cost them £2 a week for the rest of their lives.

Buttcliffe's brother, James, a contractor, left him the house and £416 a year—only if he always keeps the lace curtains up. Otherwise the annuity drops to £312.

An old lady, of cheerful disposition, accustomed to giving testimony in a Methodist class-meeting, said: "I have many merces to be thankful for. I thank God for my two remaining teeth, especially thank Him that they meet."

Preparing For The Future

British Television Station To Occupy Wing Of Alexandra Palace.

The first British television station will be built at Alexandra Palace it is officially announced.

The B.B.C. wants nearly the whole of the south wing, which comprises the Masonic suite, the Pillar Hall and refreshment bar. E. A. Cawdon, chairman of the trustees, said: "The postmaster-general stated in the House of Commons in February that steps would be taken to establish a television station in London during the latter half of this year."

Experts emphasize that television will not come into general use for some considerable time. There is no danger of listeners' ordinary sets becoming rapidly obsolete.

Radio receivers outnumber telephones in the United States; there being 18,000,000 radios, exclusive of auto sets and homes having more than one receiver, compared with about 11,000,000 home telephones.

About 70 varieties of maple trees are found in the world, but only one yielding sugar in commercial quantities.

Need for reform of border immigration laws was urged by Miss Mary McPhedran, Vancouver, before the national conference of social work in Montreal.

She cited as an instance the case history of the James family. Mr. James was born in United States of English parents. He married an English girl domiciled in Canada while visiting Canada and they went back to the United States. Two children were born in the United States, then the family moved to Canada. Another child was born. Now the family is divorced and the status of the children seems impossible to define, she said, except that the third child has a dual nationality.

In another case a Canadian working in the United States married an American there and had several children. He lost his job with the depression and was deported to Canada. Result is he is living in Canada, unemployed, while his wife and children are destitute in United States—immigration laws separating them.

In a third instance, Miss McPhedran told of the trouble an American couple had with their one-year-old Canadian girl. It took two years to complete formalities.

Canadian law had one bright side, lacking in United States, which allowed the secretary of state, on application from welfare societies, to suspend rulings on humanitarian grounds, she added.

"The theory of local responsibility for relief is outmoded," Fred R. Johnson, state superintendent of the Michigan Children's Aid Society, Detroit, told delegates.

"Unemployment causing the need for relief is not a local issue," continued Mr. Johnson. "The causes which produce it are national and international. We have not yet mastered the technique of relationship between the federal government and our states in the field of relief. Governmental machinery is cumbersome. It takes time to develop new methods of organization."

"In these days we are faced with two alternatives," said Prof. Percy Nobbs, dean of architecture at McGill University, in an address on housing. The rule of efficiency described them as "provide assisted housing for the lower wage earners; or let them live in cast-off accommodation, which means in the slums. I am reasonably assured that this second alternative costs so much in sickness, misery and inefficiency that the community as a whole is better off by shouldering the burden of an assisted housing for these wage groups."

Due to the success of the educational campaign and the publicity instigated by the Canadian Red Cross Society for the study of tuberculosis among school children and a five year educational program in the Maritime provinces, where death rates were particularly high, to which the Canadian Life Insurance Officials' Association granted over \$200,000. One large insurance company had contributed funds to send 30 students from Canada to study tuberculosis in Europe.

"Facilities are now available in every province," Dr. Wherrett said, "for carrying out a fair program. It is of interest to note that in Canada, Saskatchewan, provides free treatment for all tuberculosis patients, irrespective of their ability to pay, while another province, Manitoba, has a municipal levy which distributes the cost of indigents among various municipalities."

Dr. Wherrett mentioned the funds raised by the Canadian Red Cross Society for the study of tuberculosis among school children and a five year educational program in the Maritime provinces, where death rates were particularly high, to which the Canadian Life Insurance Officials' Association granted over \$200,000. One large insurance company had contributed funds to send 30 students from Canada to study tuberculosis in Europe.

FAIRVIEW DOIN'S

Summer-fallowing and breaking are the orders of the day now. Mrs. Bert Butcher who has been in town for the past two months or more with her mother, Mrs. Jno. Morter on account of Mrs. Morter's illness, returned home last week and reports her mother much improved in health.

We understand the graders are at work on the road south from the Church between the Guil Lake trail and the Cannon farm, so look out for a soft grade.

The Church picnic which was held last Wednesday was not quite so well attended as in previous years, but representatives from Meadowbrook, Morninghills and Lacombe were present and an enjoyable time was had by all.

AT THE AVALON "GREAT EXPECTATIONS"

"Great Expectation" comes to the screen with the real Dickens flavor untouched, right out of the pages of one of the most human absorbing and dramatic novels conceived by this greatest of English novelists, an ever-living classic of literature for all time. The story of "Great Expectations" will never grow old. It is just as fascinating and thrilling today as it was when Dickens wrote it, almost a hundred years ago, in his beloved house of Gad-hill. The story is full of descriptions of the countryside surrounding his home, of the Kentish lanes he loved so well; but it is also vivid with scenes of the London of his day, for Dickens was a great cosmopolitan figure and could write of that great city and its people with more understanding than any writer has been able to do.

One of the most interesting scenes in "Great Expectation" is the Cheapside Inn, "Lily and the Swan." The various signs on it, such "Coffee Room," "Coach Office," etc., were faithfully copied from books such as "Crackshanks' Days of Dickens" and actual places in which Charlie Dickens himself stayed.

The inn itself is of the hotel variety and is not to be confused with the common English "pub." The "Coffee Room" in such inns was always the rendezvous of the better class, while the lower class took their drinks in the "tap room," as it was called. Quite often, the post office was part of the inn, as was also the booking office for coaches in those days.

So much attention was paid to getting the proper Dickensian flavor by Universal in the making of this film, that hardly a detail was overlooked. For example "Jaguers" home, where a great deal of the action in the story takes place, is dignified in the extreme, the furniture
